Introduction

This guide explains how to operate in the POS cash register and do some backend settings in the ETISS ERP system for the Carmotions Restaurant.

Edit this section

Products management

To create/edit the products you should previously set some products properties.

Edit this section

Create Internal Category

Internal product category is used to define tax settings for products. Choose **Verkauf** backend app., click menu **Konfiguration -> Produktkategorien**

Press **Anlegen** to create the Internal Category of products or select existing one to edit it
