Prepare KBOX A-330-RPI

Download image

Version	Download Link
1.3.0.1	http://nas0.dnsalias.com:5000/sharing/wZzteL0s7

Copy image to the Micro SD Card

1. Download an image from the table above
2. Extract an archive
3. Use utility **HDDRawCopy1.10Portable** from the archive to copy the image on the Micro SD Card

Setup XOVIS cameras

Add XOVIS cameras

1. To add a new XOVIS camera, you firstly need to select the **Devices*/ *Geräte** tab.
2. Click on the **Add*/ *Hinzufügen** button.
3. Here you should specify the camera URL.
4. Specify a login to access the camera.
5. Specify a password to access the camera.
6. In this field specify the URL of your server (this field will be used for PUSH notification configuration on the camera side).
7. Save it.

Change camera credentials

- 1 If you want to change camera data just click on the camera list area.
- 2 Then click on the **Edit*/ *Bearbeiten** button.
3. After that you can change camera data.
4. And save changes.

Delete API cameras.

HINWEIS

Be careful! Do not remove cameras that are used.

1. To remove unwanted cameras, mark them.

2. **Be careful! Do not remove the cameras that are used.** Click on the **Delete*/ *Löschen** button.

Additional field designations.

The status icon shows the connection to the camera. If it is green then the connection exists, if it is red then no connection exists.

The status connection you can see also if you just click on the camera list area.

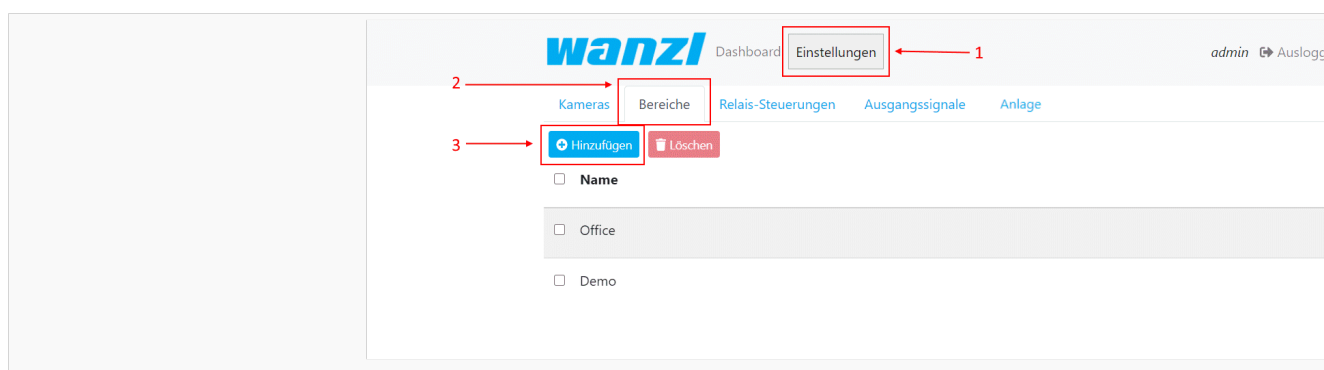

This field shows the connection error.

MAC camera address. It is automatically filled in by the server.

Setup Areas

Add Areas

1. Add a new area, you firstly need to go to **Settings/Einstellungen**
2. Select the **Areas/Bereiche** tab
3. And Then click on the **Add/Hinzufügen** button

4. Enter here the name of the area

5. Here you should specify a unique name without spaces and starts with a lowercase letter. This is a service field. For example: If you specified the name "Test", you can specify a unique name "test"

6. Here you can select a theme for the area display. For example:

7. Here you can choose the background for the "Basic" theme. If you want to add an image, you should upload it up to the server. More details on the link upload files

8. This field can be used in case if you want to specify an Offset for counter(for example when people are already in the area, but camera's counter is zero)

The image shows a screenshot of the 'wanzl' settings page. The page has a header with 'wanzl Dashboard' and 'Einstellungen' (Settings). There are tabs for 'Kameras', 'Bereiche', 'Relais-Steuerungen', 'Ausgangssignale', and 'Anlage'. Below the tabs are buttons for 'Speichern' (Save) and 'Abbrechen' (Cancel). The form contains several fields with red arrows pointing to them:

- 4 → Name * (Test)
- 5 → Eindeutiger Name * (test)
- 6 → Thema * (Basic)
- 7 → Hintergrundbild (background_wanzl.jpg)
- 8 → Zähler-Offset (0)
