Introduction

The document describes how to install the **Covcheck** application server and configure a Galaxy Gate so that COVID certificates and tests presented at the gate can be validated through the server's REST API.

Installation of Covcheck Application Server

Prerequisites

- Ubuntu 22.04 mit Internetzugang
- Benutzer mit **sudo**-Berechtigungen und Verfügbarkeit eines Benutzers mit der ID 1000 (`cat /etc/passwd | grep 1000`)
- Archiv **covid-installer.tar.gz** mit den Dateien, die in [Installationsdateien](#installation-files) aufgelistet sind

Installation Steps

- Verbinden Sie sich mit **ssh** mit dem Ubuntu-Server
- Kopieren Sie **covid-installer.tar.gz** in ein lokales Verzeichnis
- Führen Sie den folgenden Befehl aus:

```
tar xvf covid-installer.tar.gz && cd ./covid-installer
```

- Modify file **.env** and specify the database password (**POSTGRES_PASSWORD**) and, if necessary, host name (**ODOO_HOST_NAME**) and timezone (**TZ**):

Covcheck

```
POSTGRES_PASSWORD=gR7K6GT8MvQHpvLs
ODOO_HOST_NAME=covcheck.maxcr.de
TZ=Europe/Berlin
```

- If SSL certificates are provided for domain name **ODOO_HOST_NAME** put them into directory **/etc/nginx/certs**, e.g:

```
sudo mkdir -p /etc/nginx/certs
sudo tar xvf certs.tar.gz -C /
```

- If SSL certificates are not available, HTTP connection will be used and you need to modify file ****docker-compose**** accordingly:

- Add this section to container ****odoo****:

```
ports:
- 80:8069
```

- Comment out or remove port 80 for container ****nginx_proxy****:

```
# ports:
# - 80:80
# - 443:443
```

- Run the installer script:

```
script=install-covcheck.sh && chmod +x $script && ./$script -i
```

- The installation is finished successfully if you see this line in the shell:

```
### Installation finished successfully
```

You can make sure that the Covcheck is installed and running by executing the following command:

```
curl https://covcheck.maxcrc.de/covcheck/status
```

The reply must be a JSON like as follows:

```
{
  "status": "ok",
  "last_update": "2022-07-04 12:06:34"
}
```

Installation Files

.env

Configuration of Covcheck Application Server

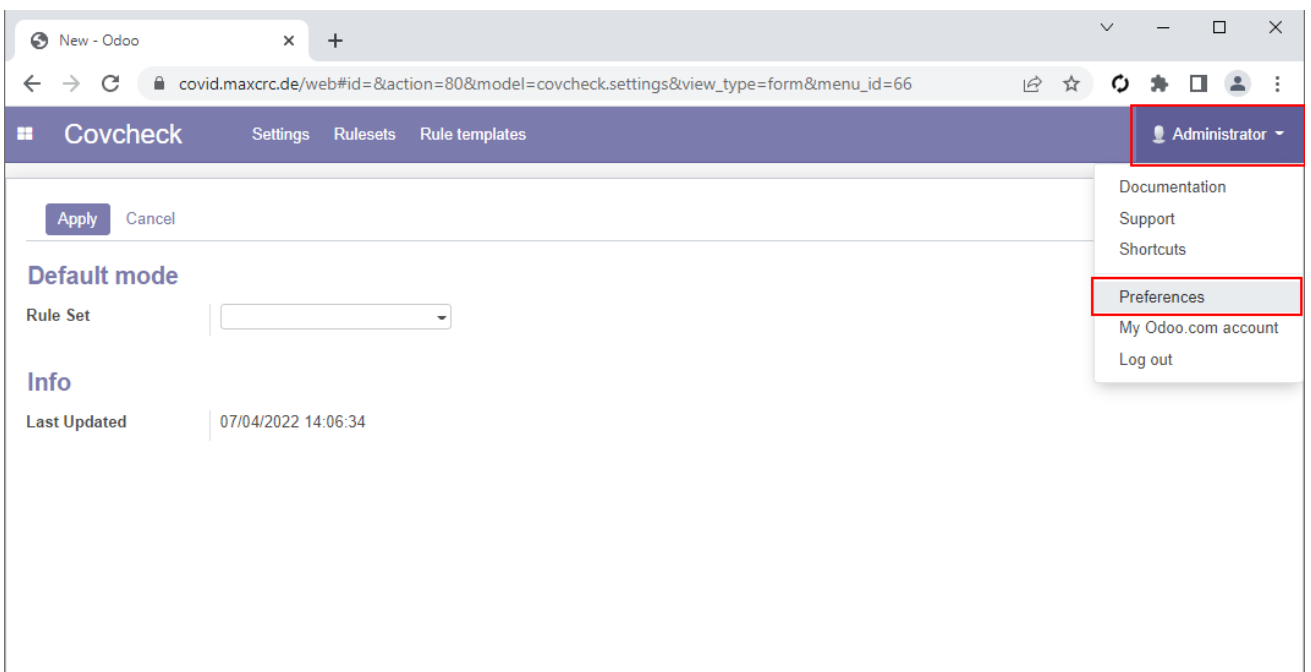

Change Default Password

Open the address of the server in a browser and logging using the following default credentials:

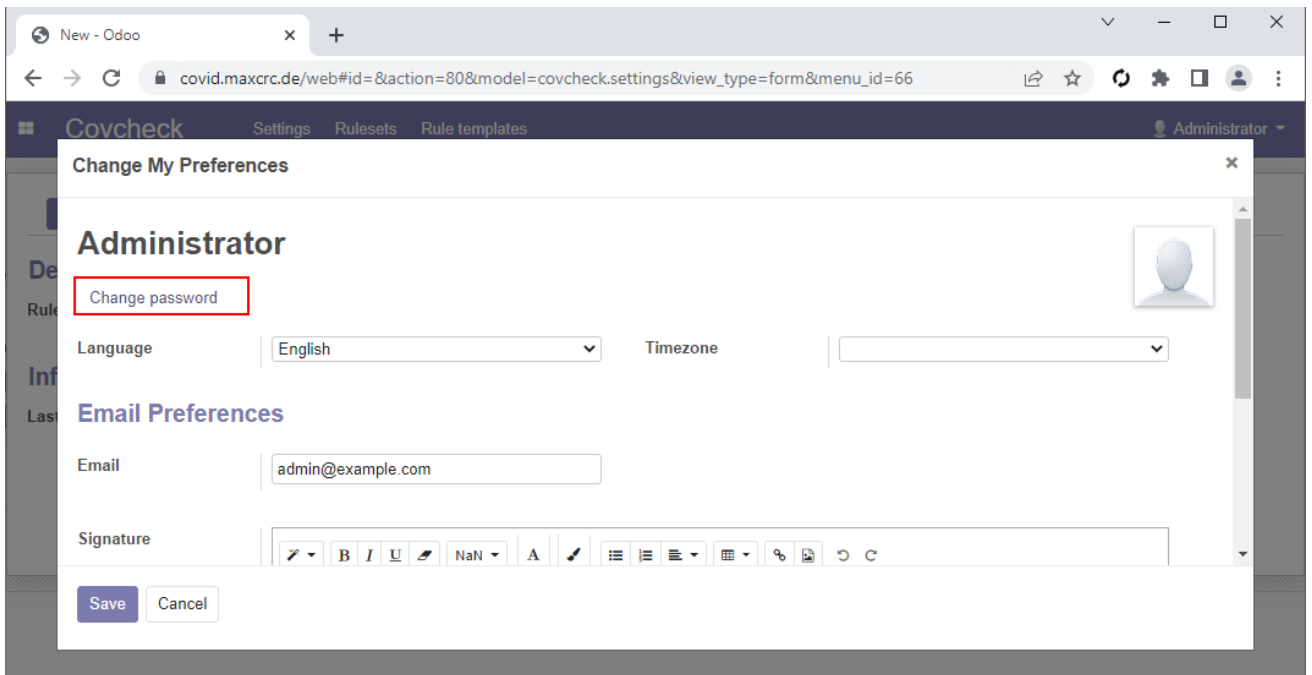

Username	Password
admin	admin

Click the **Administrator** in the top right corner and then **Preferences**:

In the opened window click **Change password**:

Fill-in the following fields and then click **Change Password**:

- ■ Old Password
- ■ New Password
- ■ Confirm New Password

Managing Rulesets

You can add, modify and delete rulesets on the **Rulesets** page:

The screenshot shows the 'Rulesets' page in the Covcheck application. The page has a navigation bar with 'Settings', 'Rulesets', and 'Rule templates'. Below the navigation bar, there are 'Create' and 'Import' buttons. A table lists the existing rulesets:

<input type="checkbox"/>	Name	Unique Name	Additional Test Required
<input type="checkbox"/>	1G	1G	<input type="checkbox"/>
<input type="checkbox"/>	1G+	1GP	<input checked="" type="checkbox"/>
<input type="checkbox"/>	2G	2G	<input type="checkbox"/>
<input type="checkbox"/>	2G+	2GP	<input checked="" type="checkbox"/>
<input type="checkbox"/>	3G	3G	<input type="checkbox"/>

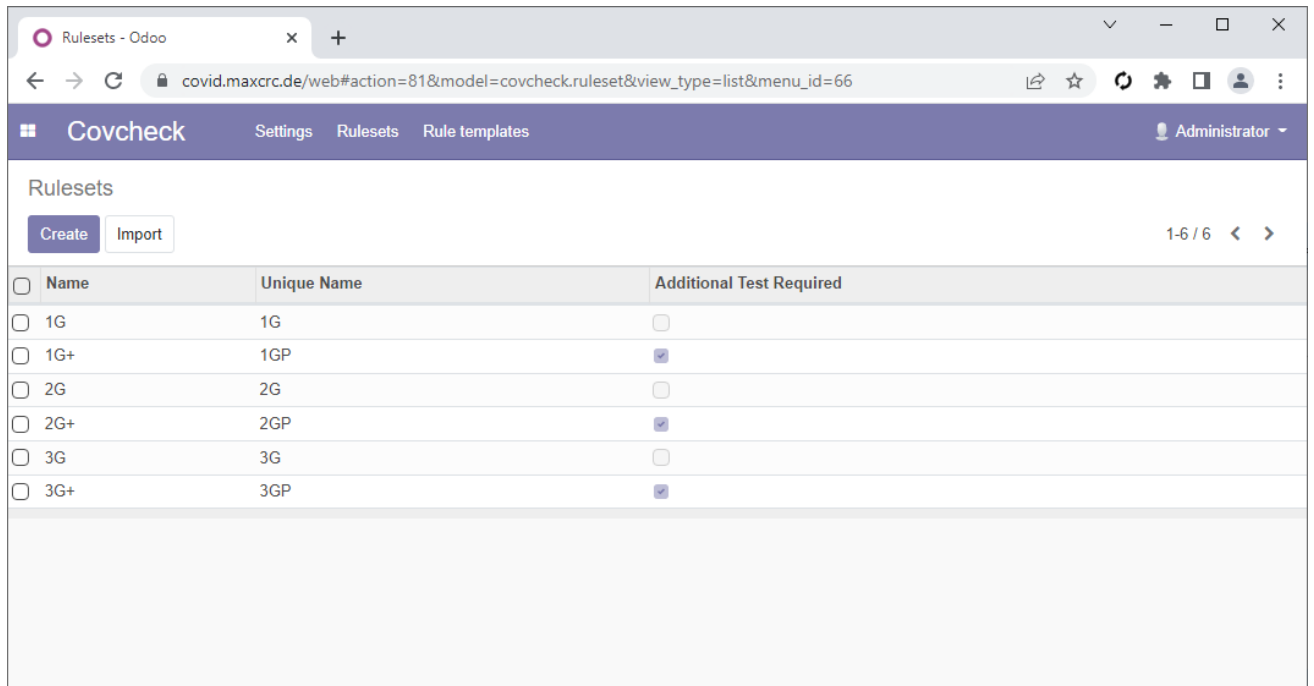

For example, let us create a ruleset **3G+**, which requires an additional test. Click **Create** fill-in the fields **Name** and **Unique Name**, check **Additional Test Required** and click **Save**:

The screenshot shows the 'Rulesets / New' form in the Covcheck application. The form has 'Save' and 'Discard' buttons. Below the buttons, there is a 'Create Options' button. The form is divided into two sections: 'Settings' and 'Display'.

Settings	Display
Name	Display Name
Unique Name	Display Date Of Birth
Additional Test Required	Display Country
Boost Instead Of Test Allowed	Display Json
Allowed Vaccination Cert	
Allowed Test Cert	
Allowed Recovery Cert	
Camera Wait For Test (seconds)	

The list now includes the **3G+** ruleset:

<input type="checkbox"/>	Name	Unique Name	Additional Test Required
<input type="checkbox"/>	1G	1G	<input type="checkbox"/>
<input type="checkbox"/>	1G+	1GP	<input checked="" type="checkbox"/>
<input type="checkbox"/>	2G	2G	<input type="checkbox"/>
<input type="checkbox"/>	2G+	2GP	<input checked="" type="checkbox"/>
<input type="checkbox"/>	3G	3G	<input type="checkbox"/>
<input type="checkbox"/>	3G+	3GP	<input checked="" type="checkbox"/>
