DASHBOARD

Main elements description

The dashboard is designed to give user a convenient way of managing and controlling equipment items registered in the system. Each dashboard item represents a physical device and consists of the following elements:

The screenshot shows a web browser window with the URL `cws-demo.maxcrc.de/web`. The page title is "ETISS Global" and the navigation menu includes "Equipment Items", "Dashboard", "Orders", and "Configuration". The main content area is titled "Dashboard" and features a search bar and filters. Below this is a grid of equipment items, each with a header row containing "Name", "Project", "Type", and "Connections". The items are:

Name	Project	Type	Connections
VU70004M Gießen	V17	More ▾	0.00€
VU70005M Gießen	V17	More ▾	0.00€
VU70001S Gießen	V17	More ▾	38.20€
TS60128M Gießen	Galaxy Gate	More ▾	0.00€
TS60129M Gießen	Galaxy Gate	More ▾	0.00€
TS60122M Location 1	Galaxy Gate	More ▾	0.00€

Annotations in the screenshot point to specific elements: "Name" points to the equipment name, "Project" points to the project name, "Type" points to the equipment type, "Connections" points to the "More" link, "State" points to the "Connection Lost" status, "Balance" points to the "0.00€" value, and "Events" points to the list of events in the first item's detail view.

- **Name:** Equipment item name.
- **Project:** A project to which this equipment item belongs.
- **Type:** Equipment item type. In case of Vending Units, this can be either V21 or V7, or other modifications.
- **Connections:** This link allows to quickly connect to the item either with ssh, or VNC and check the status.
- **Balance:** In case of VU, shows the current amount of money in the Vending Unit.
- **Events:** Shows the list of events that have happened recently.
- **State:** Displays current state of the equipment item.

VU state and events

When something happens with Vending Unit or other equipment, it sends an event to the server. You can view current status of the unit and events that happened earlier by pressing a button on the dashboard:

The screenshot shows a web browser window displaying the ETISS Global dashboard. The browser address bar shows the URL `cws-demo.maxcrc.de/web`. The dashboard header includes the ETISS Global logo and navigation menus for Equipment Items, Dashboard, Orders, and Configuration. The main content area is titled "Dashboard" and features a search bar and a filters button. Below this, a table lists equipment items. The first two items, VU70004M and VU70005M, both labeled "Gießen" and "V17", show a "Connection Lost" status in a red box. The first "Connection Lost" box is highlighted with an orange border. The price for these items is listed as 0.00€. The third item, VU70005M, shows a "Normal" status in a green box. Below these, the start of a second row of items labeled "Galaxy Gate" is visible.

Item ID	Item Name	Model	Status	Price
VU70004M	Gießen	V17	Connection Lost	0.00€
VU70005M	Gießen	V17	Connection Lost	0.00€
VU70005M	Gießen	V17	Normal	
TS60128M	Galaxy Gate			
TS60129M	Galaxy Gate			
TS60122M	Galaxy Gate			

Each event in the list is color-coded and has different weight. More reddish colors have bigger weight and need to be checked immediately. You can see detailed colors description by pressing on the "Legend" button.

The screenshot shows the ETISS Global web interface. A 'Legend' dialog box is open, displaying a table of error codes and their descriptions. The table has two columns: 'Color' and 'Description'. The error codes are listed in the 'Description' column, and their corresponding colors are listed in the 'Color' column. A red arrow points from the 'Legend' button in the background to the dialog box.

Color	Description
#E81C2B	critical error 1
#6A3499	door opened 300
#F43F5E	high priority error 500
#F4891E	average priority 1000
#EACE2A	warning 2000
#459FE3	information 5000
#0AA34F	OKI 9999
#7D8184	unknown 20000

The events list can be sorted by date and weight.

Projects

Each equipment item can belong to a certain project. You can configure projects in "Etiss Global" -> "Configuration" -> "Projects" menu. Once you add an item to a project, you can limit visibility of the project items for certain users by assigning a user to the project. After that, each user will be able to see and work only with equipment items that belong to a certain project.

USER MANAGEMENT

Available access levels

The system has 3 access levels:

- **Cashier - "vu_cashier_template"**: Works with money, has limited access to other functions of the system.
- **Service - "vu_service_template"**: Maintains the equipment and can control it's various aspects.
- **Administrator - "vu_admin_template"**: Has admin privileges and address to all functions of Etiss Global system.

To login into the system using any of these roles, open the login page, enter desired user login (email), enter password and click "Login".

The screenshot shows a web browser window with the URL `cws-demo.maxcrc.de/web/login`. The page features a purple header with the **wanzi** logo and navigation links for [Home](#), [Contact us](#), and [Sign in](#). The main content area contains a login form with the following fields:

- Email**: A text input field containing the value `vu_admin_template`.
- Password**: A password input field with masked characters (dots).
- Log in**: A blue button to submit the login information.

Creating a new user

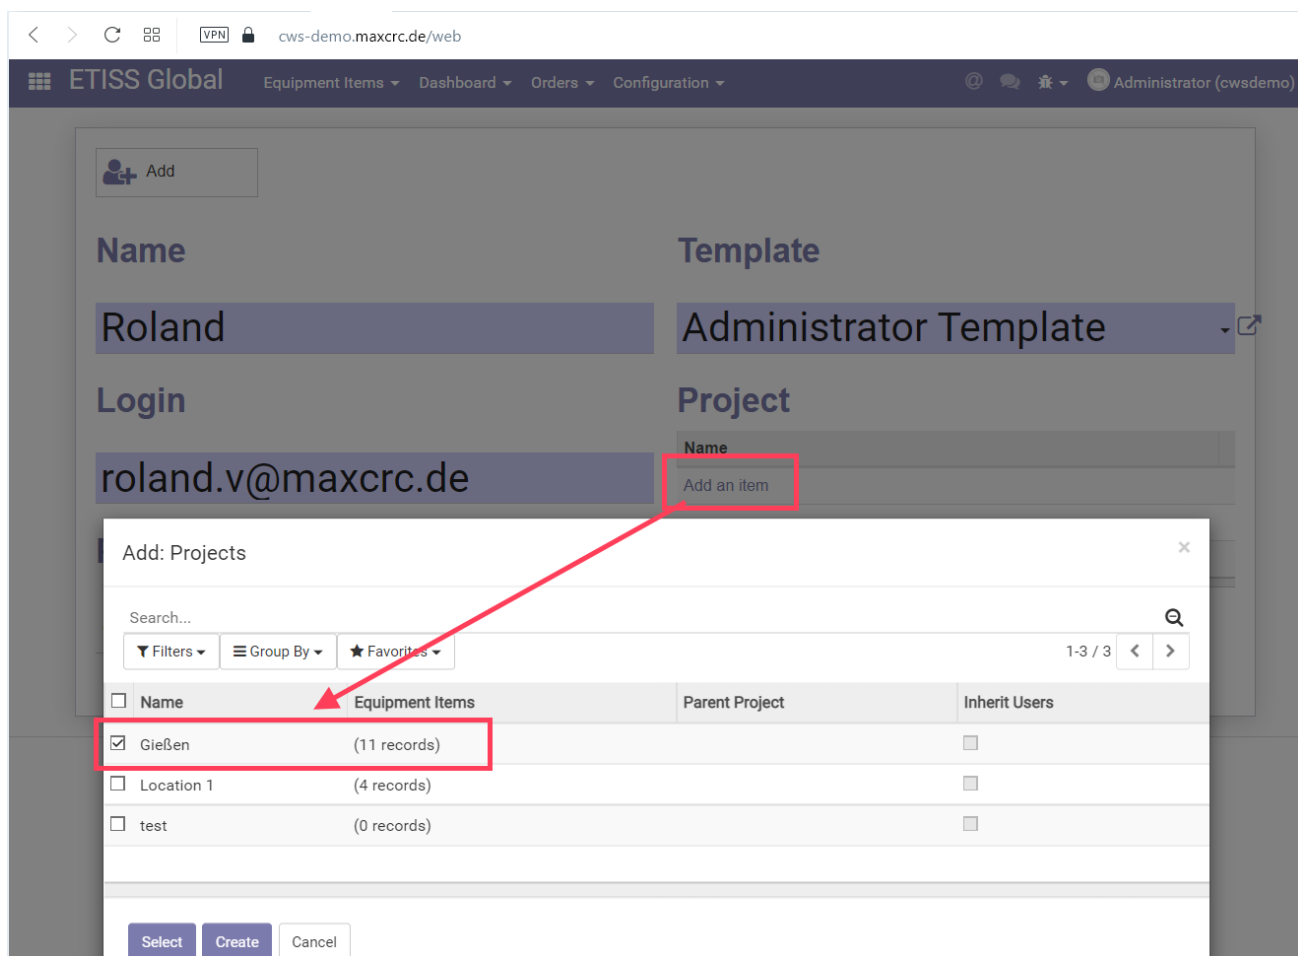

To create a new user navigate to "Etiss Global" -> "Configuration" -> "Partner registration" menu and fill in following fields:

- **Name**: User's name.
- **Login**: A login which is going to be user to log in to the system.
- **Password**: User's password.
- **Template**: Access level template ("Cashier template" - only works with money, "Service template" - takes care of the Units, "Administrator template" - Local GOD).
- **Project**: User will see and be able to work only with equipment items that belong to selected here projects.

Assigning a project to a user

To assign a project while creating a new user, in the "Project" area click "Add item" and select the required project and click "Add" button. If you've already created a user, you can open a project where you'd like to add the user, then select "Users" tab and add a user there.

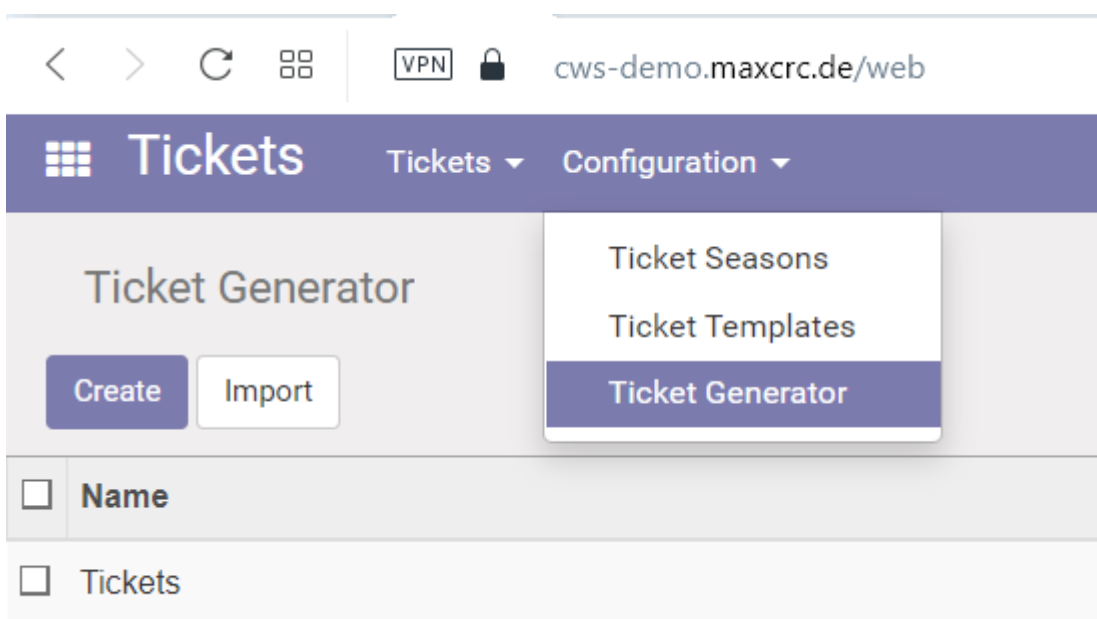

TICKETS

Ticket generator

Ticket generator allows to generate a specified number of tickets and print them out if needed. This feature can be used, for example, in case if you need to create a lot of free tickets and give them to people.

To open ticket generator, navigate to "Main menu" -> "Tickets" -> "Configuration" -> "Ticket generator":

Next, fill in the following fields:

- **Name:** The name of the generated tickets (not printed anywhere, just a display name).
- **Product:** The product based on which tickets will be generated. (Ex: to generate free tickets, you need to select free product here).

Click "Save", and after that click **Generate tickets** button.

Select the number of tickets to generate and click **Generate**

Printing generated tickets

Once tickets were generated, you can print them out by pressing **Print generated tickets** button.

RFID CARDS

RFID cards generator

RFID card generator can be used with reader to mass register RFID cards. An operator scans the card with the reader, these cards then being added to the list of cards separated by the line break, space, comma, or semicolon. And finally, after selecting the card type, these cards then can be registered in the system in one click.

Generating RFID cards

The screenshot shows a web browser window with the URL `cws-demo.maxcrc.de/web`. The page title is "RFID Cards" and the navigation menu includes "Cards" and "Configuration". The user is logged in as "Administrator (cwsdemo)". The main content area is titled "Mass Register RFID Cards" and contains the following form:

Type	StaffCard
Ticket Product	1 Entry
RFID Cards	AABBCCDD EEFFGGHH 11223344

A "Register" button is located at the bottom left of the form and is highlighted with a red box.

To use RFID cards generator go to "RFID cards" -> "Configuration" -> "Mass register" and fill in the following fields:

- **Type:** The type of RFID card to be registered.
- **Ticket product:** The product on which the linked ticket will be based.
- **RFID cards:** An array of RFID cards to be registered. These can be obtained from card reader or pasted via clipboard manually. The system understands the following card separation symbols: **line break**, **space**, **comma**, or **semicolon**.

Assigning a partner to generated card

After all necessary cards were successfully generated you can assign a previously created partner to them. This can be done by opening a card and selecting a partner.

From the menu "RFID cards" -> "Cards" -> "Registered cards" open any card, click "Edit" and in the **Partner** field select desired partner.

Now this card is associated with a partner.

Assigning a card to Vending Unit

After assigning a partner to a card, this card can be linked to the vending unit with a specified access level. To do this, login as Administrator, find and open a vending unit to which you need to link a card, and click on its configuration settings. In this case it's "VU Single FMCU" link.

RFID Card	Role
3914E41F	Administrator
MI4IITC2	Service
HELLO	Cashier
HPL3BYSE	Guest

Assigning a card to project

The card also can be linked to a project. But you have to keep in mind that assigning a card to a particular VU configuration has precedence over assigning it to the project. To assign a card to a project, go to the "Etiss Global" -> "Configuration" -> "Projects" menu, select a project and on the "Service cards" tab link a card with corresponding access level.
