

## NationalesAutomuseum/en

---

### Introduction

---

This guide explains how to operate in the POS cash register and do some backend settings in the ETISS ERP system for the Carmotions Restaurant.

[Edit this section](#)

### Products management

---

To create/edit the products you should previously set some products properties.

[Edit this section](#)

### Create Internal Category

---

Internal product category is used to define tax settings for products. Choose **Verkauf** backend app., click menu **Konfiguration -> Produktkategorien**
